## **DETAILED ACTION**

### *Allowable Subject Matter*

1. Claims 1 and 3-8 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Neither prior art of record nor references teach an engine comprising a cylinder block; an oil sump casing; a hole formed in the oil sump casing of the engine to communicate with the crankcase; a cap having a dipstick and a spigot with a non-circular radially projecting flange; the cylinder block having an overhanging lip adjacent the hole; wherein the spigot is rotatably received in the hole and the flange is selectively engaged beneath the overhanging lip to prevent axial displacement of the cap from the engine. The prior art reference, WO 01/98639 A1, appears to show an overhanging lip 23 wherein the flange portion 12 is snapped in. However, the flange portion 12 is not a non-circular flange, the lip portion is not formed on the cylinder block, and the engagement between the cap and the hole is snap engaged rather than rotatably engaged.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
